

Cupid's quiver

Cupid needs your help packing his quiver! In each challenge, you are presented with a selection of types of arrows Cupid may choose to pack into his quiver. Each type of arrow has a specific “warmth” and “magnetism.” You want to maximize the warmth Cupid has in his quiver, but in each challenge, there is a limit to how much magnetism the quiver can hold.

Go to <https://tinyurl.com/cupidsquiver> to get a digital copy of all of the data for this challenge, and to use the interactive checker (make a copy of the spreadsheet first so that you can edit it). Your submission should be in the form of this spreadsheet with 1's in column D for each type of arrow you want to add to the quiver.
